# WEATHER OF CONCERN

## Weather of Concern

- The combination of gusty winds and very dry conditions will create critical fire weather conditions across most of the State through 10/15/17.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

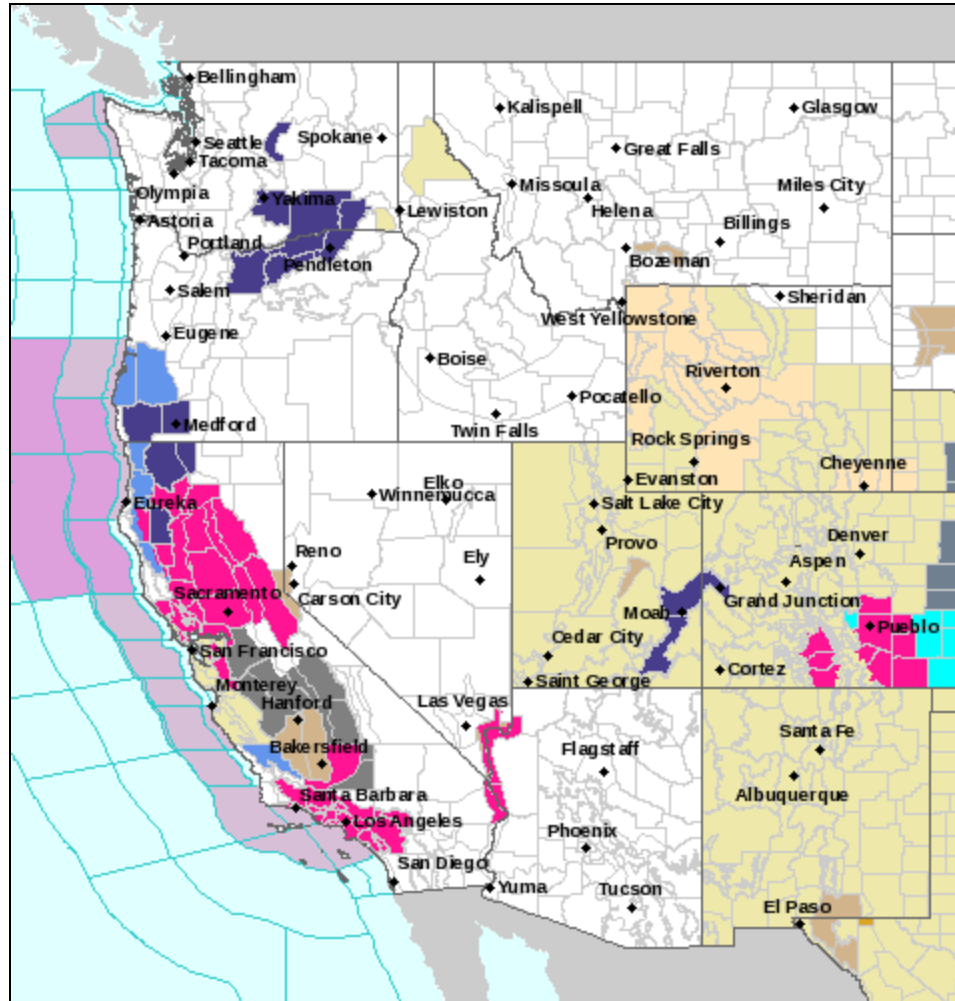

Our weather pattern will continue to support more periods of strong N to NE wind and low relative humidity (RH) into Saturday evening. Winds will be a bit lighter in the Sacramento Valley and quite a bit quieter elsewhere. The winds will pick up again and be strongest early Saturday, so "High Risk" for Significant Fire Potential has been designated for the Sacramento Valley/Foothills (NC05) today into Saturday evening, and through Saturday evening for the Mid Coast to Mendocino (NC02), Bay Marine (NC03A), Diablo-Santa Cruz Mountains (NC03B), and the far western portion of the Northern Sierra (NC07). Peak gusts are expected to be 40 to 50 mph late tonight locally stronger gusts possible in the most wind prone areas.

A high pressure ridge will take over our weather pattern by late Sunday and the air mass over Northern California will be very dry everywhere with widespread low afternoon RH (8-18%) and poor to moderate (20-50%) recoveries overnight. Winds will be quite light. A low pressure trough will likely arrive over the West Coast later next week, but how much precipitation may come along with that is very uncertain at this time. However, it appears there will be a chance of at least some rain over the northern and eastern mountains.

## **SOUTHERN CALIFORNIA**

A ridge of high pressure moving northward from Mexico will bring significant warming Saturday through Monday. Most valley locations across Southern California will receive maximum temperatures in the 90s during this time. Minimum humidity will be mainly in the single digits and teens across the region through Monday. Winds will become northeast 20 to 30 mph with gusts to 50 mph across the mountains and below the canyons and passes of Southern California Saturday morning and continue through Sunday morning. Winds will become light Sunday night and Monday. The ridge over California will weaken and a Pacific trough will drop down the West Coast bringing a gradual cooling trend and increase in humidity Tuesday through the end of next week. There will be gusty westerly winds across the mountains and deserts Tuesday through the end of next week.
